COMMERCIAL.

SATURDAY, April 7, 1883. Last week we adverted to the numerous foreign arrivals, and again we have to note arrivals from Europe, the United States and China, which naturally bring about considerable business. As previously alluded to in these columns, the wharf accommodation has been found insufficient for our rapidly increasing trade. The coasters have been making rapid passages of late, thanks to the temporary return of the trade winds, and the consequence is, that domestic produce has come to hand in large quantities. Prompt settlements of quarterly accounts show a favorable condition in finan- rai mose cial circles, though most of our retail dealers would prefer monthly settlements. A meeting of Chinaman, tends to show that his credit was unlimited and as many of the notes presented in Court were long overdue, it was self evident that implicit trust was reposed in him. The estate will

probably pay 50 cents in the dollar. The sudden influx of Chinese labor has caused quite a surprise, more especially when we are suddenly apprised that about 5,000 more will arrive 40 during the ensuing five weeks. This matter being of such importance to the community in general we have devoted a lengthy editorial to the subject which we commend to the perusal of all.

The arrivals comprise the C B Bishop from Bremen, the S S Oceanic from Hongkong, the Elinor Vermon from New York, and two whalers. The Sadie F Caller called off the port en route from

The departures for the Coast comprise three vessels with cargoes valued aggregately at a quarter million of dollars. The S S Occanie did not take away any freight being unable to enter our port owing to her heavy draft of water.

The receipts of domestic produce for the week have been, Scoan, 29,550 packages; Roca, 500 bags; PADDY, 1750 bags.

The stock of cattle has been added to by the landing of one bull and two cows of the celebrated Holstein breed from Oldenburg. Judge McCally is the speculative importer.

The prices realized at the regular cash sales of our auctioneers during the week have been very fair. This day at 10 a.m. will be commenced the sale of carriages and carriage material belonging to the estate of the late M. J. Rose. In the evening Mesers. Lyons & Levey advertise a very important sale of paintings, engravings and fancy articles.

As will be seen in our advertising columns, Messre. Whitman & Wright have purchased the Majesty business of the late M. J. Rose, which they promise to earry on in all its branches. Being practical men, good results may be anticipated from their

A MEETING was held at Koolauloa on Monday, March 26th, by the electors of the district. The Hon, J. Kaluhi was elected chairman, and Mr. H. the like, after the days work is done. Some stores have recently been in the habit of keeping open later than formerly, and it is probable that all N. Kahulu asked the following question: "Is it proper for this district to make known through the newspapers that they are opposed to the actions and views of His Majesty's Ministers?" The Rev. J. N. Paikuli proposed that "this meeting do hereby acknowledge the dignity of His Majesty the King, and by so doing they also approve of the policy of the Government." This resolu-tion was approved of unanimously. Mr. H. Kanaihilo then read the following resolution : Resolved : We, the people of the district of Koolauloa Oahu, from Kaaawa to Waimea, hereby declare that we are not in accord with the district of Wailuku, Maui, or any district, or any single person, who are opposed to the present Ministers of His Majesty the King. We rely and depend upon Section 42 of the Constitution of the year 1864. And this meeting of the district of Koolauloa hereby declare, our approval and appreciation of the present Government." After solemn prayer, the meeting dispersed.

WE briefly noted Wednesday the receipt by the bark C. R. Bishop, from Bremen, of a bull and two cows imported by Judge McCully for the Pawaa Dairy. The interest which the whole country has in the introduction of first class breeding animals induces us to give some particulars which we have since learned. These animals are of the breed generally known us Holstein cattle,-sometimes also called Frisian. They are bred in the "Low countries " of Germany and Holland, and are the breed which has made Holland famous, and we may say rich, by the productions of beef, butter, and cheese. It is claimed for them that they combine milk, cheese, butter and beef more successfully than any other breed The milking by official certificates. They are the first Holthoroughbred Herefords, and thoroughbred Anis no reason why the Islands should not come to produce cattle which will compare in excellence with any in the world, and it is an object worthy the attention and emulation of the enlightened

'THE TIMES' LEADING ARTICLE, - Extract from the London Times :- Passing by a crowd of minor notions, we come upon the exhibit of the Waltham Watch Company, which, in economical importance, is perhaps superior to anything else shown. The rivalry of the watches of this Company has already been felt by our own makers, and a hesitating at tempt was made last session, in the interest of the Coventry manufacturers, to prevent the watch cases of the Company receiving the English stamp, which certifies that they are made of gold. It would seem that the Waltham Watches may defy all attempts to exclude them in this indirect way. Their first claim to public approval was derived from the extraordinary nicety of their construction. They were made with such perfect exactitude that the parts of all watches of the same class could be interchanged, and, production being thus made possible on a large scale, cheapness as well as excellence was secured. But the Company have gone on introducing improvements in their art, and the ompensation balance they have devised seems to have overcome the standing difficulty of the vary ing expansibility of the spring and the wheel. It is said that the delicacy of construction of the mechanism invented by the Company is such that a micrometer they exhibit at Paris measures the twenty-five-thousandth part of an inch, and might readily be divided under a lens into one-hundred thousandth parts. Loss of the U. S. Corvette " Ashuelot."

manded.

The captain. officers, and crew of the U. S. corvette Ashuelot arrived in Hongkong on the 21st February by steamer Thales. The ill-fated vessel, it seems, struck the East Lammock rock on the 18th February in a dense fog. Her bottom was coated with mud, and the shock did not appear very severe, but she at once commenced to fill and went down in forty minutes in fifteen fathoms of water. In the meantime the boats had been got out, and the men were got into them as speedily as possible. Owing, however, to the steam-launch being secured with iron instead of hemp, considerable delay was caused in getting it out, and before all the men could be got off, the ship went down with eight Americans and three Chinamen, who were drowned. The boats reached the lighthouse, and from thence one of them went to Swatow, a distance of thirty-six miles, for assistance. The revenue cruiser Ling Feng gave her services and went out to the rock, bringing back the remainder of the ship's company, who came on to Hongkong by the Thales. The fog was so dense that it was only possible to see a few yards ahead, and the reason of the vessel getting upon the rock was that she was caught in a current of which her officers were unaware, and carried far out of her reckoning; indeed at the time she struck, it was thought she was at least eight miles distant from where she actually was. The current was so strong that one of the boats drifted four miles in two hours. It was not until three o'clock in the afternoon that the boats found the lighthouse. The Ashuelot was a double ender of 786 tons, and carried six guns. Her complement consisted of twelve officers, 123 seamen, and 18 marines.-

Mr. EDITOR: I notice that an opposition paper referring to the head of the ministry, says: "That it may not be amiss occasionally to desigrecord of some of these animals is higher than nate a discordant element which no community that claimed for any other family, going as high | can foster with impunity." It seems very strange, as 16,000 to 18,000 lbs. in one year-a that such a charge as the above should find place pound being a little less than a pint. These in the printed mouthpiece of the very party, animals arrived in excellent condition after who, but a short time since were so anxious to a voyage of five months, an encouraging circum- step into political power with the help of stance, as showing in another instance that we this very "discordant element." At that time Breaks, may draw for good stock on Europe and the they looked upon him as the ablest and fittest United States. They were selected in Olden- man in the community for the high position into burg by Mr. J. C. Pfluger, with the aid of some | which they persistently, but vainly strove to coax agricultural friends, as representing the best him. It he was worthy of the confidence and restrains of the breed. One of them has taken speet of those parties then-and he must have three prizes in exhibitions, and all of them are been so, or such models of integrity would cerentered in the Oldenburg Herdbook, as appears | tainly not have selected him. Mr. Gibson should stand in as high favor with them to-day, for he steins imported into the kingdom. We have, has done nothing since that time, either in pubwithin the last four years, had imported thor- lie or in private life, to forfeit the esteem of any oughbred Jerseys, thoroughbred Short-horns, right thinking man or class of men in our midst. Now, Mr. Editor, without multiplying words gus, or Scotch-polled cattle. The importation | does it not seem to you that these political malthat we are now noting, will, to say the least, contents and disappointed aspirants for place and contribute another strain of good stock. There | power would wish to say to Mr. Gibson: "If you had joined with us and used the political power which we well knew you were possessed of, to raise us into high office, we would set you up on high, and lauded your many virtues to the and enterprising importers and breeders of the skies, but as you paid no heed to our overtures, and turned your back upon us, thereby leaving us out in the cold, we will do our utmost to picture you as a devil." It looks very much like this to me and reminds me forcibly of a young man in California, with wh m I unfortunately was acquainted some time ago, who, failing gain the affections of a young lady, set himself to the villainous task of traducing her character. For the life of me, Mr. Editor, I cannot see what they hope to accomplish by their unscrupalous attacks upon Mr. Gibson, for in slandering him they only try to destroy what was once precious to them or would have been had they possessed themselves of his aid. My acquaintance with the gentleman is very slight, having met him but once in private life, yet I read the papers and take some little account of passing events. If you deem the above worthy of a place in your columns, Mr. Editor, please insert and Consistency.
